About Us

PASKEM Fine Chem Pvt. Ltd. is renowned manufacturing and marketing company in the market of Laboratory Chemicals and Reagents.

We have completed successfully ten years in the market. Here we would like thank all of our promoters, end users and stockiest for extending their guidance and confidence on us.

During the last Ten years we have consolidated ourselves as a prominent supplier of the diversified range of products from routine analytical reagents to speciality chemicals like Laboratory Reagents, Microbiological Stains and indicators, Solvents, Cleaning Solutions, Buffer Powder & Solutions, Culture Media Bases, Volumetric Solutions, ICP/AAS/Reference Solutions, Ion Pairing Reagents etc.

This year we are coming in the market with some new products and pack size to serve our customers with a broad range of products. All Lab Chemicals provided by us come in original and sealed containers with full descriptions backed by Certificates of Analysis (COA) and Material Safety Data Sheets (MSDS). The products are produced under suitable environmental conditions with reference to standard specifications.

Being an ISO 9001 : 2015 certified company, we are following Quality Management System(QMS) and here customer satisfaction is the main focus of our services.

All supplies are made through our authorised stockists and dealers in the major towns of our country. They ensure safe and fast deliveries to the valued end users. This infrastructure is supported by our professional sales team and qualified technicians. Besides, export to some countries are also operated through our overseas distributors in Asian, African and Gulf countries.

Grades of Purity

Analytical Reagents(AR)

Our product range covers a lot of AR products conforming to the highest international standards for Analytical and Research work of the most responsible characters. Impurities (trace) in these Products are restricted to the lowest possible limits.

For Synthesis

These are general purpose reagents used in various routine applications in Laboratories.

For Microscopy

These products are standardised by UV spectrum ‘

For Biochemistry

Highly Purified Reagents free from inhibits such as traces of heavy metals for use in Biochemical Research and Analysis.

Pure, Purified, Extra pure

Purified products used in many Laboratories to conduct its analytical tests.

For Microbiology

Products which have been specially purified and tested for their microbiological applications.

Diagnostic Reagents

These are specially produced for the use of various Hospitals, clinical & pathological Laboratories for diagnostic purpose.

Buffers

Suitable for working where pH varies in the field of Biochemistry / Biotechnology.
